Art Unit: 1712

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 to 16, drawn to a method of making a film, classified in class 427, subclass 387.
 - II. Claims 21 to 29, drawn to a base material, classified in class 428, subclass 409.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make a materially different product, such as a base material that does not contain a first wiring pattern. This requirement is consistent with that made in parent application 10/616,731.
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
4. A telephone call was made to John Ryan on 5/12/05 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicants requested that the restriction requirement be mailed.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1712

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
